

Workforce Management Anytime, From Anywhere

ExakTime Connect is the hub of the ExakTime system. Manage employee time records, job costing information, locations and other field data all in this powerful cloud-based program, from any device.

Use any browser-based device to check the status of any of your jobs, see who's clocked in, schedule shifts or review overtime hours and site activities.

Owners, supervisors and even workers can be granted permission based on their roles for appropriate levels of access.

Software Capabilities

- Cloud-based program for convenient anytime, anywhere access
- Track workers and projects in real time for better on-the-go decision-making
- Stay compliant with employee break & injury sign-off plus digital time card approval
- Automatically calculate overtime, travel time and time-rounding based on your pay rules
- Accurately track labor and job costing to understand how your resources are being spent
- No hardware or software updates—you're always running the latest version
- Cutting-edge data center provides maximum security to safeguard your data with automatic data backup
- Prepare for payroll throughout the week, and resolve errors & omissions as they occur
- Role-based permissions allow employee self-service and managerial control
- Powerful reporting provides the information you need to make informed business decisions

Who Benefits From ExakTime Connect?

Everyone. The exchange of up-to-date information between individuals, departments and management is fast and easy, allowing you to make informed business decisions in the office or on move.

Employees

No more paper time cards or paycheck surprises. Employees can and approve review time cards with a signature on our app.

Supervisors

Filling out timesheets for crews is history. Check on workers, crews and job sites from anywhere.

Project Managers

All the latest data in the cloud makes scheduling, oversight, project budgeting and safety assurance possible anytime, from anywhere.

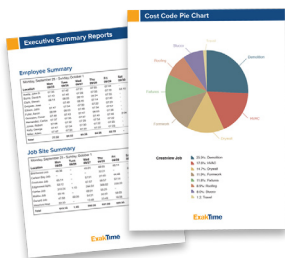

Payroll Department

Hours and job costs are available on any web browser and can be synced with your accounting program for seamless processing.

Executive Management

Business owners, executive management and CEOs can check in to view real-time data anytime. Powerful reports support strategic decision-making.

Works with your accounting or payroll system

We sync collected labor hours and site information with 90+ accounting programs—eliminating the time drain and errors that manual data entry can bring.

Payroll prep time is cut in half, giving you more time to focus on growing and managing your business.
