ExakTime Mobile App

Powerful workforce management in the cloud with the simplest mobile time tracking app.

Track labor in real time, view data from anywhere

Workers simply enter their unique, 4-digit PIN number and tap the green 'Go' button to clock in or the red 'Stop' button to clock out—or supervisors can track and manage a whole crew. All data is synced with the cloud for better workforce management from anywhere.

GPS precision

The software pinpoints workers' locations at clock-in and clock-out and uses your custom-set Geofences to mark each timestamp as on or off-site. Our GeoTrakker feature lets you track workers as they travel, so you know where they are as long as they're on the clock.

FaceFront photo ID verification

FaceFront uses your device's front-facing lens to snap photos of workers as they clock in and out. Simply match these with employee master photos stored in your office computer (no more buddy-punching).

Scheduling & remote oversight

Schedule worker shifts and tasks in advance, and never wonder what's happening at a remote job site. ExakTime Mobile gives you a one-screen snapshot of any job site with a live feed of clock-ins and clock-outs, a running labor budget, Field Notes, weather and more.

iOS & Android compatible

- Works on any iPhone or iPad with iOS 4.0 to the latest version or Android running OS 2.1 to the latest version.

- FaceFront works on devices with front-facing cameras using iOS 4.0 or later and Android 2.3 or later.

- Please ask your sales representative for additional details.

ExakTime Mobile lets you

- Track your employees with 100% accuracy on the device you already own

- Know they're at the job site when they say they are

- See a map view of which crews are clocked in, and where

- Post shifts to workers' schedules, track activities and budgets as projects progress

- Review data on the go or at your desk via ExakTime Connect

- Collect employee time card approvals with signature on the go

- Transfer information easily to your accounting program

ExakTime Mobile App
(continued)

Field Notes

This feature allows workers or supervisors in the field to record text, audio or photo updates that are sent to the cloud with one click, for review now or later in our web-based software, ExakTime Connect.

Supply needs or purchases, equipment incidents or repairs can be easily conveyed with multimedia updates that appear instantly on the ExakTime Connect dashboard.

Mobile Compliance

Tracking compliance with our mobile app is easy and reliable. Workers can review digital time cards and approve them with a signature. You can also prompt employees to sign off on compliance-related questions regarding breaks and injuries at clock-out.This information protects your business from audits, lawsuits and fines because you'll have digital proof of checking all compliance boxes.
